

Human Brain VS Computer

Motivation

Human mind
Computer

- Good at image recognition, pattern recognition etc
- Good at arithmetic calculations

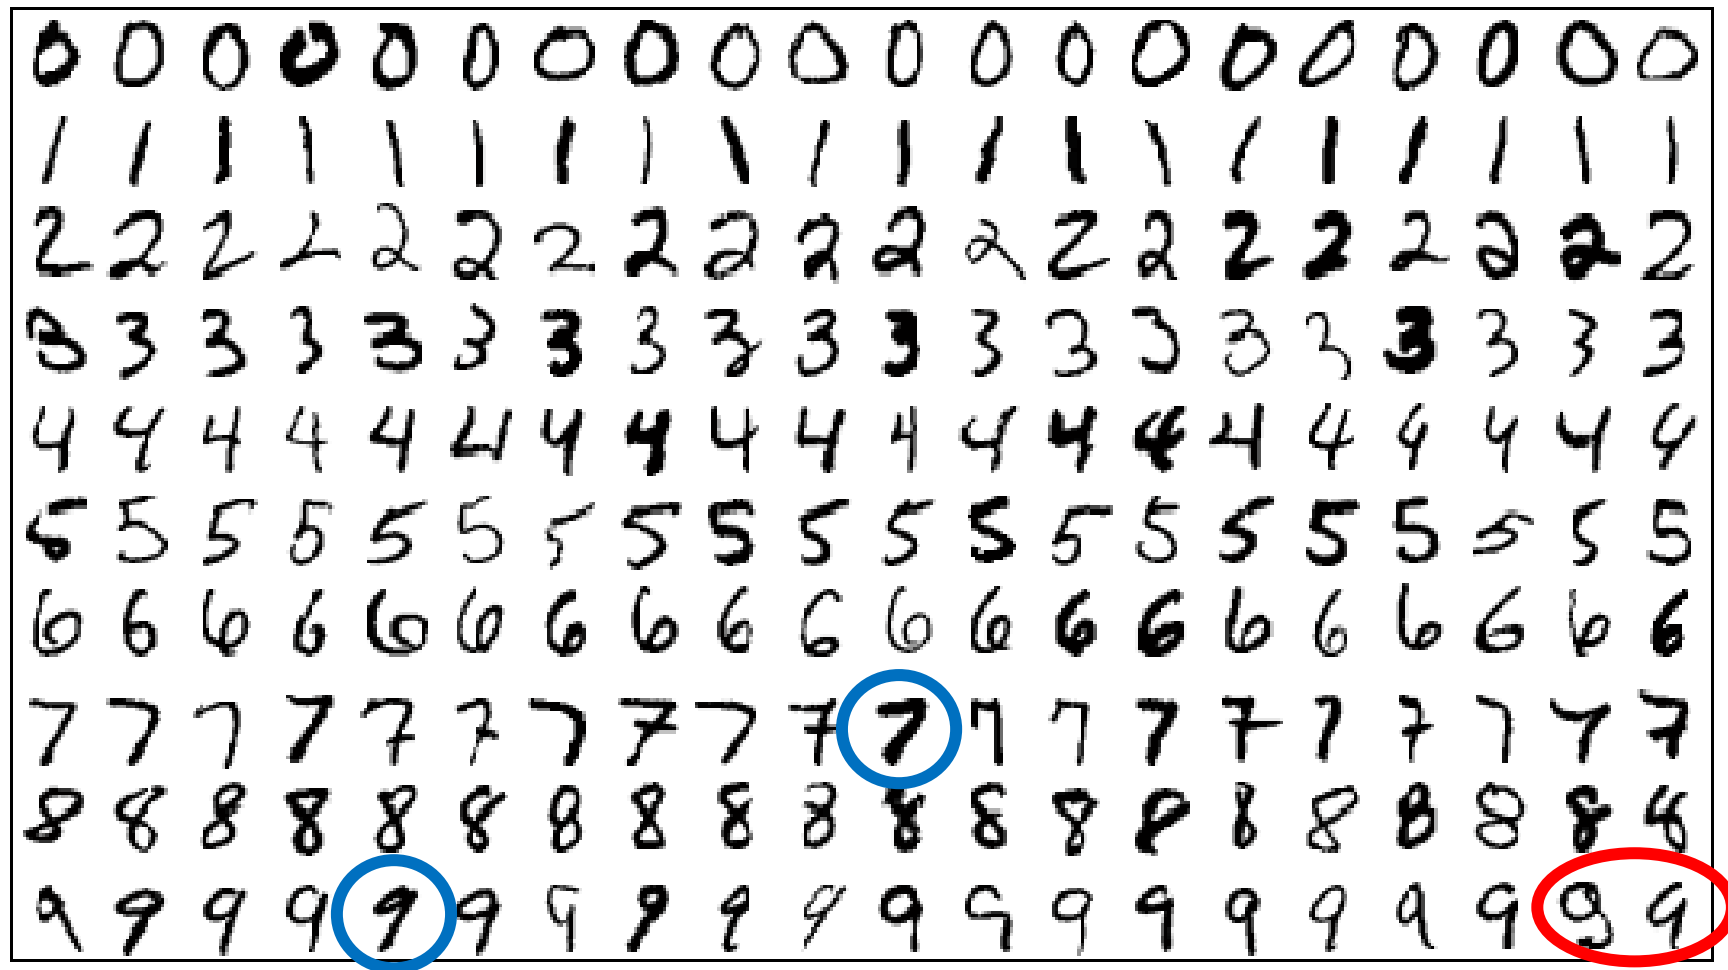

$$2574304 \times e^{354} \div \tan 5.1\pi$$

Handwriting recognition

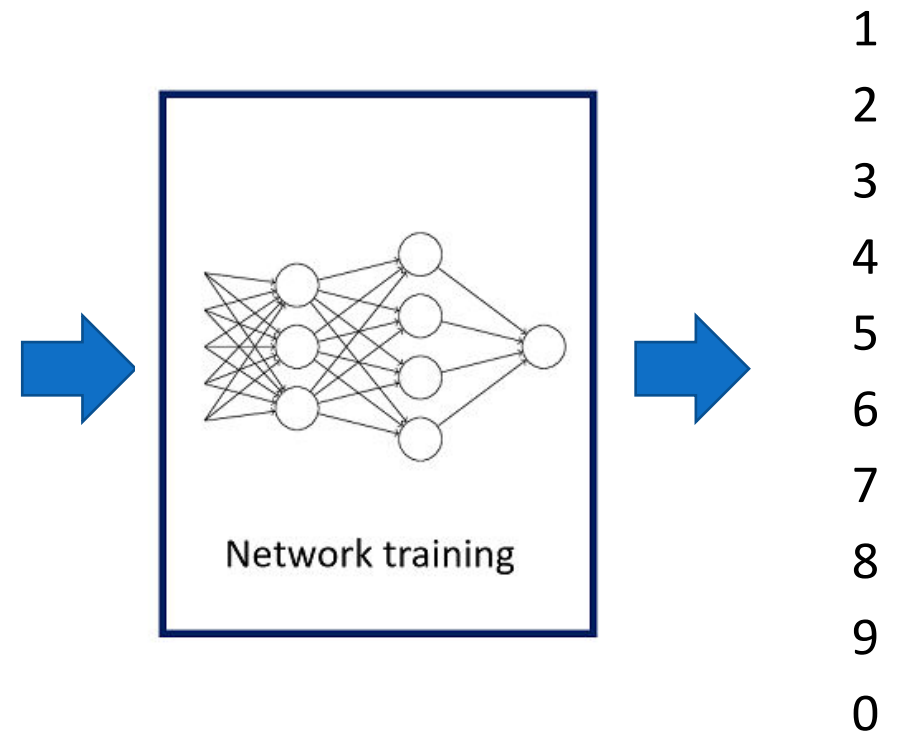

Making precise
rules is difficult

Neural Networks

Neural Networks creates own complex pattern recognition rules

Basic terminology

[illegible][illegible][illegible][illegible][illegible][illegible]

Training data

Future Prediction

Dataset

Fashion MNIST

We will classify images
into 10 fashion items

Course Flow
